

## Environment Spectrum – The Information Serial on Environment and Aviation

12.11.2007

Fraport AG's Environmental Management has an excellent reputation in the international airport business. A large number of groundbreaking initiatives to reduce aircraft noise and save resources originate from Frankfurt Airport's environmental management.

Fraport's Environmental Management has created an information serial titled "Spektrum Umwelt", which reports on achievements in the environmental field as well as on environmental issues in connection with Fraport's business activities. This information serial is being continuously expanded.

Here you can download copies of the information serial issues already published:
