

AirIT Services AG

26.01.2007

Area of activity:

AirIT Services AG is a subsidiary of Fraport AG and responsible for planning and operating the information and communications infrastructure of the airport in Hahn and also at the areas of Mönchhof, Ticona and Gateway Gardens and for the Fraport-IUK sales activities for the new Airrail-Center.

The Airport IT-Services Hahn AG provides support to airports and their service-providers with the following services:

- building and operating of complex information and communication service infrastructures
- building, including planning & implementation, and operation of airport terminals
- user care
- project management

A competent on-site team offers creative solutions for planning and implementing PC, server and network installations. It also performs practical tasks such as planning and managing cabling and telecommunications services ranging from simple ISDN connections all the way to high-speed Internet access. Straightforward assistance for implementing and maintaining tailored office and airport software solutions rounds out our offering.

Fraport's share in the company:

100%
