

Perishable Center GmbH + Co. Betriebs KG

27.09.2005

Areas of activity:

- Picking, sorting and packing
- Product-specific tempered storage
- 18 different temperature ranges, from -24° C to +24° C
- Port of first entry
- Veterinary services, plant protection, Federal Agency for Agriculture and Food office in-house
- Customs warehouse for perishable products
- Check of temperatures upon arrival, departure and while in transit

Europe's most advanced air cargo handling center for perishable goods is able to sort, pick & pack and appropriately store up to 200,000 metric tons of fresh produce a year. The PCF offers first-class service around the clock, with 18 different climate zones geared to different product groups on its total of over 9,000 square meters of floorspace. The temperatures can be set, computer-controlled, to between -24° C and +24° C.

Product-appropriate handling in the PCF

- Optimum storage to meet all requirements of airlines, forwarders, importers and exporters
- Picking and packaging according to customer specifications for distribution to all European markets
- Additional value-adding services such as ice packing for fish
- Timely quality checks by certified experts

Fast handling in the apron area

- Identification and segregation of cargo right after unloading aircraft
- Transport to/from the cooling center within a fixed time limit

EU border inspections right in the PCF

- Inspection of goods by veterinary and plant protection services and EU quality monitoring
- Everything under one roof: complete fiscal processing, documentation, EU quality check (port of first entry)

Fraport holds a 10-percent share in the company.
