

Trainees

Trainee at Fraport AG

You want to continue the success you had in your degree course and start an interesting career? So why not take off at Fraport AG? In our 23-month training scheme, we can give you an opportunity to be actively involved in the divisions of our Group and to take on a variety of operational and strategic jobs. You will also be learning about our work routines. In the medium or long term, you will have the prospect of taking on a specialist or - later - management position.

The current group of trainees commenced training on April 1, 2008. Once the starting date for the next group of trainees has been set, it will be announced here.
