

Retail & Properties

Perfect management behind the scenes

Frankfurt Airport (FRA) is a highly attractive international business location. FRA is unique in terms of centrality of location, transportation links, size, the enormous consumer potential and wide variety of businesses already located here.

In the Retail & Properties division all competencies and activities for commercially developing, marketing and managing FRA are concentrated in Fraport's non-aviation business segment. We develop and market space and attractive concepts: for example, for exclusive office space close to the passenger terminals and retail or special property at Cargo City.

In balance with the operational airport processes we create innovative shopping and service worlds that make staying at Frankfurt Airport an extraordinary experience - for instance, the newly opened  Shopping Avenue and the new  Shopping Boulevard as well as the planned  Airport City Mall.

Our portfolio also includes real estate development and management, parking management as well as energy and utility supply. Through our Media Frankfurt subsidiary, we are also active in the area of airport advertising.
