

## Our IT & telecommunication services

### A dependable partner for all your IT infrastructure needs

Whether consulting or planning, development, implementation or operation of entire information and communication facilities – the IT experts at Fraport AG can place a broadly faceted service spectrum at your disposal.

Our innovative and secure IT solutions are based upon decades of experience in the airport business and extensive knowledge of the specific requirements of a major airport. Trust in that expertise.

#### **Communication technology: Easy to reach**

We provide you with a complete telecommunication network covering the entire airport. Transmission of voice, data and image information is thus guaranteed with an availability of 99.9%.

You get excellent communication technology – innovative and tailored to your specific needs and requirements, including on-site service.

#### **Data communication: Limitless knowledge transfer**

We offer you the complete IT infrastructure for uncomplicated data communication: Our trendsetting products and services will smoothen your path to fast and secure exchange of information and data. Whether its about planning and developing communication platforms for LAN or WLAN systems, operating and debugging or even long-term archiving of data – we offer you solutions perfectly tailored to your needs, and all from a single source.

#### **IT-Solutions: Creating smooth processes**

In the IT Solutions area, we make flight-relevant data available to you, specifically attuned to your needs. So you get precisely the information you need. And you benefit from our extensive airport know-how and intimate familiarity with Frankfurt Airport as a business location.

#### **Security systems: Secure around the clock**

Security is a key factor in operating an airport. Our state-of-the-art security systems offer quality and reliability at the highest level. Especially in this area, you can count on our airport-specific know-how.

#### **Control Room Management: Reliable coordination**

Control Room Management at Fraport AG coordinates the central IT infrastructure for all control rooms at Frankfurt Airport. Because of the steady growth in air traffic, ever bigger volumes of data need to be processed. By deploying state-of-the-art technology, we are ideally equipped. Our goal is smooth exchange of data for maximum efficiency.
