

## Products & Services

### Our Services for Your Successful Airport Business

All big airports in the future will be much more than only terminals with aircraft traffic and parking garages. They will be Airport Cities having a highly dynamic structure with a multitude of functions.

Fraport is ready for this and already offers numerous services from a single source for successful airport business. In addition to the standard airport services such as flight operations, terminal operations, airport and aviation security and ground handling, Fraport AG's portfolio includes real estate development, airport retailing, facility management and the intermodal linkage of air, rail and road transportation. Fraport AG and its subsidiaries or associated companies offer these services worldwide.
