On Site in 180 Seconds

Three fire stations are strategically located around the airport premises so that any point of the runway system and apron can be reached within three minutes. The principal responsibilities of the airport fire brigade are firefighting, rescuing accident victims, and fire prevention.

Responsibilities of the airport fire brigade:

- Firefighting in aircraft and buildings
- First aid (first responder activities)
- Technical assistance
- Risk management and avoidance (hazardous goods)
- Support for deployments of other fire departments near the airport

Activities of the firefighter training center (FTC):

- Competent center for fire safety at airports
- Basic and further training
- Fire simulation
- Aircraft rescue and recovery worldwide
- International advice on fire protection
