Temperature- controlled transports

Professional transport
of temperature-sensitive shipments

Temperature-controlled transports – safe, reliable and controlled

We offer the right infrastructure for temperature-controlled transports between handling agent and aircraft, and provide digital shipping documents for your temperature-sensitive freight (e.g. medicines).

Pharmaceuticals

Art

Animals

Astronomical Mirrors

Fraport temperature-controlled transports services

Ordering, transportation, and storage

- Monthly basic cleaning, disinfection and filter change
- Disinfectants: Wofasteril E400 / Alcapur E1

Documentation

- Documentation of orders and status reports
- Documentation of servicing, cleaning, disinfection and filter changes

Safe transport for your temperature-sensitive shipments

Equipment

- Temperature cooling and heating from -30°C to +30°C (air-conditioning technology from the market leader Carrier)
- Fresh air filtration
- Controllable cargo-hold air circulation
- Inspection hatches on doors
- Pneumatic tires and air suspension
- Height-adjustable loading sill (min. height 45 cm / max. height 61 cm)
- Temperature monitoring using SMS alerts and visual and acoustic alarms for deviations of +/-3°C -Temperature

Dimensions, weight and load

External dimensions

- Height: 3.36 m during operation
- Width: 3.41 m
- Length: 8.76 m with drawbar trailer

Weight and load

- Weight: 4,950 kg
- Maximum load: 5,000 kg

Suitable for all standard ULD:
 2 x 5 ft ULD
 1 x 10 ft ULD / pallet

Internal dimensions

Trailers for horse transports on the apron

- Daylight window (opens partially)
- Interior LED lighting
- Controllable ventilation system
- Pneumatic tires and air suspension
- Sound and weather insulated
- Height-adjustable loading sill
- Suitable for all standard ULD for equine transports (e.g. AMH)
- Two seats for accompanying persons
- Emergency exit for accompanying persons
- Alarm button
